

We are extremely pleased to announce that we have been acquired by the Mott Corporation, a precision filtration company trusted by the world's best technical and performance brands.

We have partnered with Mott for several decades – this is a logical next step in our already close partnership, and we are excited about the value that this will bring to our customers.

This combination creates a filtration and fluid control company with an extensive material selection for the most demanding customer applications in key markets including Semiconductors, Life Sciences, Clean Energy, Oil/Gas, Petrochemicals, Chemicals, Water Purification, and Aerospace & Defense.

An expanded collective presence throughout North America, South America, Europe, Asia, Africa, and the Middle East gives Mott and ASCO Filtri the ability to manage and deliver mission critical filtration projects and products worldwide.

We will be operating as ASCO Filtri, A Mott Company. Over time, you will see significant additional benefits in the following areas:

- Ⓜ Increased resources and customer support
- Ⓜ Increased expertise across new segments
- Ⓜ New precision filtration solutions
- Ⓜ More bandwidth to provide an even better customer experience

Our existing staff will continue to provide the excellent level of service and support you have come to expect. Our entire team is very excited about joining Mott, a company that shares our values and vision for the future.

We encourage you to visit Mott's website at <http://www.mottcorp.com> to learn more about the company we are joining.

Please feel free to reach out with any questions you may have about these exciting changes or how the combination of ASCO Filtri and Mott Corporation can bring you additional benefits.

We also take the chance to thank you all the RFK staff that owned Asco Filtri in the last two years without change its governance, understanding the great value of this acquisition and facilitate the negotiation and the acquisition processes.

Sincerely,

Ennio Michelini, Managing Director
ASCO Filtri, A Mott Company
